

# Biohubx

---

innovation launches here

# Who we are

---

Biohubx is a not-for-profit organization that ignites the life sciences ecosystem in Alberta by creating the right conditions for companies to commercialize, scale and be successful.

We leverage government support, industry partnerships and collocate growing life sciences startups around us – de-risking the transition to commercial operations.

HUB 1 is a state of the art bio-molecular lab with DynaLIFE Medical Labs as the industry partner. We are currently planning future hubs with varying specialties.

# Who we serve

---

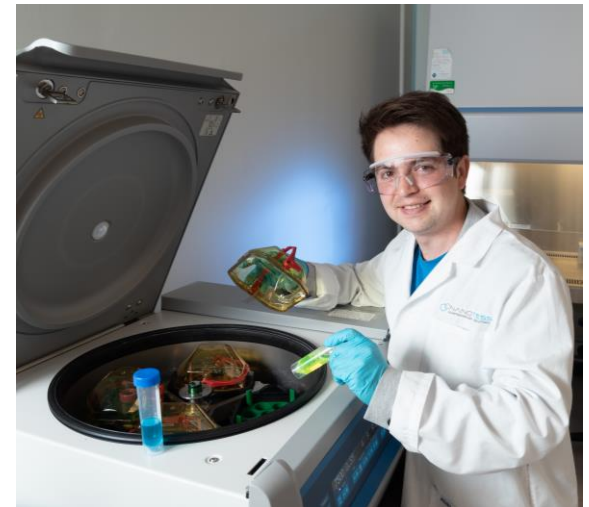

We have a broad membership and try to assist where we can. There are three groups we are best suited to serve:

1. Canadian or international life sciences ventures who are ready to scale in their own independent space. These may be pre-revenue or in early revenue.

Stage of client journey: Commercializing & Scaling Companies

2. Established industry partners interested in supporting the life sciences ecosystem and being connected to start-ups and early stage companies, founders and technologies.
3. SME's who would like to be plugged into a supportive community of innovators.

Optimal referral: life sciences company looking for private lab & office space, access to research lab and technical/regulatory support for ISO/CPSA/MDSAP.

# What we offer

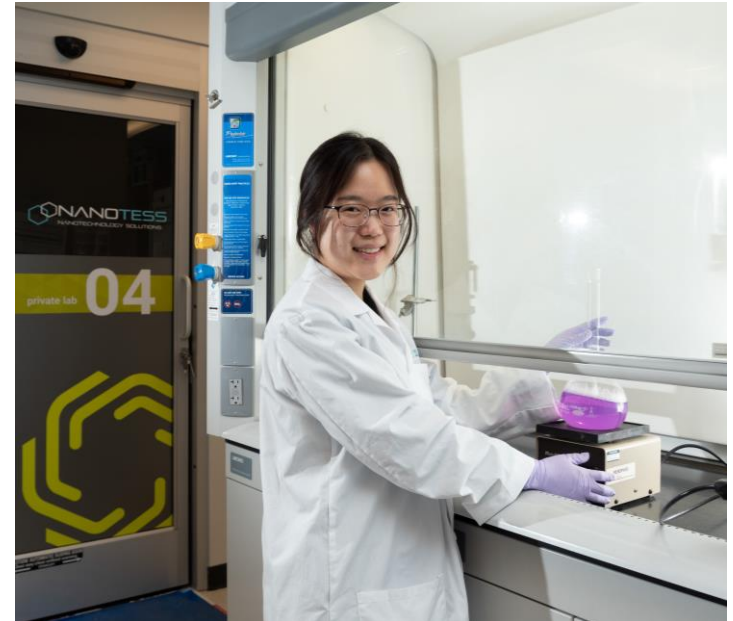

---

For ventures:

- Flexible private lab & office space
- Common lab with bio-molecular focused equipment
- Regulatory expertise
- Life sciences network and opportunities
- Technical expertise and services through Rapid Validation Program
- Our virtual office package

For industry partners:

- Opportunities for partnerships and program co-creation
- Event collaboration (Expert Corner, workshops, etc.)
- Chance to support ecosystem in practical ways
- Connections in life sciences ecosystem

# Connect with us!
